SUBJECT INDEX FOR VOLUME 34

Abdominal compartment syndrome, acute anuria and, 160
Abdominal mass, in enterocolic lymphocytic phlebitis, 252
Abdominal pain
  hereditary angioedema in, 57
  recurrent, with superior mesenteric artery thrombosis, 554
Abdominal surgery, portal decompression before for severe portal hypertension (letter), 489
Acalculous cholecystitis, in hemobilia and jaundice (letter), 191
Aceruloplasminemia
  defective electron transfer in complexes I and IV in (abstract), 349
  in Italian patient, molecular characterization of (abstract), 330
Achalasia
  acid and, 382
  Barrett's esophagus and, 439
  botulinum toxin in, 126
  diagnosis of, 54
Acid-achalasia association, 382
Aconitase/IRP-1 cluster, in iron regulatory protein modulation (abstract), 300
Aconitases, of *Escherichia coli* (abstract), 369
Adaptation, in short bowel syndrome, 207
Adenomatous hyperplasia, liver, huge, 272
Adhesive intestinal obstruction, in short bowel syndrome, 207
Aedes aegypti, identifying cis-regulatory elements of HCH-ferritin gene in (abstract), 366
Africa
  genetically selected high iron maize in improving iron status of children in (abstract), 333
  NRAMP1 gene in iron transport in multiple sclerosis patients in (abstract), 348
African-Americans
  iron parameters in (abstract), 354
  iron stores in (abstract), 299
  Takayasu's arteritis and Crohn's disease in, 454
Aging process, free iron ion release in erythrocytes during (abstract), 352
AIDS-associated lymphoma, jejunocolic fistula with (letter), 194
AKA DCT1 isoform, definition and location of (abstract), 298
ALA, uroporphyria caused by (abstract), 347
Alcohol
  adenomatous liver disease and, 272
  iron and (abstract), 304
  metabolites of, in doxorubicin-inactivated cardiac IRP-1 and IRP-2 (abstract), 314
  pancreatitis induced by, laboratory diagnostic tests for, 459
  in prevalence of cirrhosis in hereditary hemochromatosis (abstract), 302
Alcoholic hepatitis, duplex Doppler ultrasonography of hepatic artery in, 573
Alkaline reflux, esophageal pH monitoring for, 200
Allele frequency, of HFE mutations in southern France (abstract), 352
Allergy, food, gut barrier dysfunction and, 385
Alpha-lipoic acid, removing excess iron in occupational diseases accompanied by hyperferremia (abstract), 344
Alzheimer's disease
  hemochromatosis as risk factor for (abstract), 307
  iron metabolism disruption in, animal model for (abstract), 304
Aminopyridyl chelators, iron and zinc interaction with (abstract), 310
5-Aminosalicylate conjugates, for ulcerative colitis, 397
Ammonia, arterial levels of in cirrhosis, 578
Ampullary adenoma, eosinophilic gastroenteritis masquerading as, 240
Anal fissure, botulinum toxin in, 126
Anal sphincter disorders, botulinum toxin in, 126
Anemia
  in gastric antral vascular ectasia (letter), 283
  refractory, erythropoiesis restoration in (abstract), 345
Angina, microvascular (editorial), 3
Angioedema, hereditary, in transient abdominal pain, 57
Angiography-based study, of biochemical and genetic markers of iron status and coronary disease risk (abstract), 346
Angiosarcoma, computed tomographic and magnetic resonance imaging of, 463
Animal models
  of altered expression of intestinal iron transporters in chronic liver disease (abstract), 318
  deferoxamine and deferiprone treatment in (abstract), 351
  for disrupted iron metabolism in Alzheimer's and Parkinson's disease (abstract), 304
  of iron overload cardiomyopathy (abstract), 313
  in understanding iron homeostasis (abstract), 294
Anion-binding sites, of human transferrin (abstract), 368
Anismus, botulinum toxin in, 126
Announcements, 197, 497
Anomaly, of common bile duct and cystic-left hepatic duct junction, 280
Anti-tumor agents
  iron chelators as (abstract), 311
  iron-mediated cardiotoxicity of (abstract), 314
  modifying RNA-binding activity of iron regulatory proteins (abstract), 308
Anti-tumor necrosis factor, for ulcerative colitis, 397
Antibiotics, for ulcerative colitis, 397
Antiendomysium antibody, in celiac disease, 430
Antigenesity, of soluble transferrin receptors derived from erythroid and non-erythroid cells (abstract), 333
Antimitochondrial antibody, *Teucrium polium* with (letter), 100
Antimycin A, stimulating non-transferrin bound iron uptake in HeLa cells (abstract), 372
Antineoplastic agents, desferrithicin class iron chelators as (abstract), 350
Antioxidant effects, of yeast frataxin, stimulating iron usage and inhibiting fenton chemistry (abstract), 321
Antiviral therapy, high-dose interferon α-2b and ribavirin in, 177
Antrectomy, for gastric antral vascular ectasia (letter), 283
Anuria, giant nonpancreatic pseudocyst causing, 160
Aortic dissection, in Takayasu's arteritis and Crohn's disease, 454
Apo-transferrin, internalization of in CaCO2 cells (abstract), 298
Apoptosis
  iron deprivation induction of (abstract), 309
  p53-independent, tachypyridine inducing (abstract), 305
  tumor cell sensitivity to (abstract), 350
Aroylhydrazone chelators, structure-activity relationships of (abstract), 310
Aroylhydrazones, in iron chelation therapy (abstract), 344
Arterial ammonia levels, in cirrhosis, 578
Arterioportal fistula, in acute pancreatitis and hemobilia after liver biopsy, 481
Arthritis, screening for hemochromatosis in (abstract), 355
Arthropathy, of hemochromatosis, TNFα polymorphisms in (abstract), 336
Ascites, in end-stage liver disease, 89
Ascorbate, in duodenal cytochrome B expression and function (abstract), 373
Asian population, C282Y mutations origins among (abstract), 334
Aspirin
  in colorectal tumorigenesis and chemoprevention, 117
  endoscopic evidence of mucosal injury with, 529
Aspirin abuse, atypical and aggressive upper gastrointestinal ulceration with, 523
Astrocytoma cells, gene expression as function of iron status in (abstract), 322
Australia
  GLY142SER polymorphism in Parkinson's disease patients in (abstract), 331
  non-HFE related hemochromatosis in (abstract), 330
Australian Red Cross Blood Service (ARCBS) policy, on therapeutic venesection for hemochromatosis (abstract), 356
Autosomal dominant hereditary hemochromatosis, mapping to 2q32 and association with missense mutation in ferroportin1 gene (abstract), 316

B-class soft metals, duodenal brush border transport of versus essential trace metals (abstract), 376
B6 fibroblasts, iron-responsive element containing mRNAs in (abstract), 360
Bacterial lactoferrin binding protein A, recognizing lactoferrin C-lobe domains (abstract), 372
Bacterial overgrowth syndrome, leiomyosarcoma of small intestine presenting with (letter), 104
Bacterial transferrin binding protein B, peptide-peptide interactions between human transferrin and (abstract), 361
Bacterioferritin, from sulfate reducing bacterium *Desulfovibrio desulfuricans* ATCC 27774 (abstract), 371
Barrett's esophagus
  achalasia and, 439
  chronic esophageal reflux disease and, 382
  diagnosis of, 111
  with prolonged use of proton pump inhibitors, 536
Beef, dietary, effect on ferritin levels of in genetic hemochromatosis mutation carriers (abstract), 338
Beger procedure, for chronic pancreatitis, 72
Belgrade rats
  divalent metal transporter 1 expression and iron transport in brain of (abstract), 321
  DMT-1 expression in kidneys of (abstract), 323
  iron handling by (abstract), 361

Beta-thalassemia carriers
HFE gene H63D mutation in (abstract), 326
proton transverse relaxation rates and heterogeneity of liver iron concentration in (abstract), 325
β2-microglobulin mutations, in hemochromatosis patients (abstract), 338
BFR-negative *Escherichia coli*, generation of second ferrous iron pool in (abstract), 359
Biliary pancreatitis, laboratory diagnostic tests in, 459
Biliary strictures, plastic tube stents without side holes for, 77
Billroth II partial gastrectomy, endoscopy outcomes after, 421
Bimodal cardiac dysfunction, in iron overload cardiomyopathy (abstract), 313
Biochemical markers, of iron status, coronary disease risk and (abstract), 346
Bioinformatic extraction, versus systematic sequencing in identifying single nucleotide polymorphisms (abstract), 328
BIOIRON 2001 World Congress
abstracts of (editorial), 199
on iron metabolism, abstracts from, 292
Biologically active aroylhydrazone chelator, oxidation of catalyzed by iron(III) (abstract), 342
Biopsy
in diagnosis of preneoplastic epithelial of gut, 111
pyloric metaplasia detection and, 141
Biosusceptometry (SQUID), in liver iron measurement (abstract), 339
Blood donation, HFE gene polymorphisms in protection against iron deficiency associated with (abstract), 335
Blood donors
E168X and W169X HFE mutations prevalence in (abstract), 356
genetic screening for hemochromatosis in (abstract), 319
HFE mutations, iron deficiency and overload in (abstract), 320
iron accumulation detection in (abstract), 336
iron homeostasis in (abstract), 362
Blood samples, stability of iron and oxidative stress parameters on storage of (abstract), 361
Body iron stores, HFE mutations and (abstract), 362
Bone marrow transplantation, for thalassemia, cirrhosis reversibility after iron clearance and improvement in chronic hepatitis with (abstract), 332
Bone mineral density, in Crohn's disease, 49
Book reviews
Artificial nutrition support in clinical practice, 2nd edition, 590
Chronic viral hepatitis: diagnosis and therapeutics, 496
Controversies in surgery, volume 4, 196
Core curriculum in adult primary care 2001: gastroenterology, 590
Encyclopedic reference of parasitology: diseases, treatment, therapy, 108
GI/liver secrets, 2nd edition, 107
The liver biology and pathobiology, 496
Liver disease in children, 2nd edition, 107
Longitudinal endosonography, 196
Modern management of cancer of the rectum, 496
Botulinum toxin, gastrointestinal uses of, 126
Bovine serum ferritin-binding protein, interacting with fibrinogen (abstract), 362
Bowel infarction, in short bowel syndrome, 207
Bowel preparation, fatal hyperphosphatemia from, 457
Brain
divalent metal transporter 1 expression and iron transport in (abstract), 321
glial tumors of, iron metabolism peculiarities in (abstract), 349
iron and iron binding compounds in (abstract), 349
iron deficiency effect on regional transferrin, transferrin receptor proteins, and mRNA levels in (abstract), 378
Brandt, Lawrence J., biography, 1
Brazil, celiac disease in, 430
Breast cancer, gastrointestinal pneumatosis after docetaxel chemotherapy for, 444
Brush border, selectivity of DMT1 for divalent metal transport across (abstract), 376
Brush border membrane, divalent iron and other transitional metal ion transport across (abstract), 375
Budesonide, for ulcerative colitis, 397
Burden of illness, in uninvestigated dyspepsia, 516

C1 esterase inhibitor, defect in, 57
C-lobe domains, bacterial lactoferrin binding protein A recognition of (abstract), 372
C-terminal hexa-histidine TAG, recombinant non-glycosylated human serum transferrin containing (abstract), 370
CA19–9, in prognosis of gastric cancer patients, 408
Cachexia, decreased production of interleukin-12 and Type 2 immune responses in, 416
CaCO2 cells
copper and ceruloplasmin effect on iron transport in (abstract), 377
DMT1 and apo-transferrin internalization in (abstract), 298
DMT1 regulation in (abstract), 360
by non-heme iron (abstract), 374
Cadmium exposure, during pregnancy and lactation, iron status and (abstract), 334
CagA virulence strain, with prolonged use of proton pump inhibitors, 536
Calcium, extracellular, additive stimulatory effect of on non-transferrin ferric iron uptake by HeLa and K562 cells (abstract), 374
Caloric restriction, iron behavior and metabolic indices with in dysmetabolic iron overload syndrome (abstract), 331
Campylobacter jejuni colitis, recurrent Henoch-Schönlein purpura with (letter), 492
Cancer chemopreventive response, ferritin and (abstract), 310
Carbohydrate scaffolds, siderophore mimetics based on (abstract), 345
Carbonyl iron, absorption of in rats (abstract), 375
Cardiac patients, noncardiac chest pain in, 6
Cardiomyopathy, iron overload, bimodal cardiac dysfunction in animal model of (abstract), 313
Cardiotoxicity, iron-mediated, of anti-tumor therapy (abstract), 314
Carotid atherosclerosis, serum ferritin and C282Y as predictors of (abstract), 346
Cascade screening, of hereditary hemochromatosis, impact of (abstract), 335
Cataracts, ferritin crystal, in hyperferritinemia cataract syndrome (abstract), 350
Caucasian Americans, iron parameters in (abstract), 354
Caustic injury, esophageal replacement for, 225
CD19, in Crohn's disease, 64
Celiac disease
in Brazilian adults, 430
duodenal expression of divalent metal transporter 1 and transferrin receptor in (abstract), 319
gut barrier dysfunction and, 385
in lymphocytic colitis (letter), 288, 289
Cell biology, of siderophore uptake in saccharomyces cerevisiae (abstract), 306
Cell cycle control, iron in (abstract), 351
Cell-mediated low-density lipoprotein oxidation, transplasma membrane electron transport in macrophages and (abstract), 346
Cell proliferation
effects of on transferrin bound iron uptake by hepatoma cells (abstract), 377
inhibition of, in normal and transformed rat hepatocyte cultures by hydroxypyridinone CP411 versus CP20 (abstract), 342
in overexpression of H- and L-ferritins in HeLa cells (abstract), 300
Cellular iron
homeostasis of
HFE wildtype versus HFE C282Y mutant proteins in (abstract), 329
nitric oxide-mediated IRP2 modulation in (abstract), 359
metabolism of, modulated by hydrogen peroxide (abstract), 360
release of in response to UVA-induced oxidative stress (abstract), 347
Cellulitis, spontaneous cholecystocutaneous fistula presenting with (letter), 99
Central nervous system processing abnormalities, in noncardiac chest pain, 6
Certification, of gastroenterologists as physician-nutrition specialists, 505
Ceruloplasmin
decreased serum activity of in HFE C282Y+/+ male iron-overloaded patients (abstract), 299
homologue of, implicated in iron homeostasis (abstract), 358
in iron transport by CaCO2 cells (abstract), 377
transcription of, dual regulation of by insulin in HEPG2 cells (abstract), 323
translational silencing of in interferon-γ activated monocytic cells (abstract), 365
Cetirizine, acute hepatitis associated with (letter), 493
Cfos knockout mice, in vivo ferritin expression in (abstract), 364
Cheilitis granulomatosa, in Crohn's disease, 557
Chelation therapy
iron shuttle hypothesis in (abstract), 311
NTBI assessment of in (abstract), 311
Chelators, lipophilic, binding mitochondrial iron (abstract), 302
Chemically induced hepatic neoplasm, VEGF expression in (abstract), 347
Chemoprevention, eicosanoids, cyclooxygenases and nonsteroidal anti-inflammatory drugs in, 117
Chemopreventive compounds, in ferritin expression in vivo (abstract), 364
Chemopreventive response, ferritin and (abstract), 310
Chemotherapy
for colorectal cancer, 15
gastrointestinal pneumatosis with, 444
Chest pain
noncardiac, 6
noncardiac (editorial), 3
unexplained (editorial), 3
Childhood, intestinal protein loss in acute, persistent diarrhea of, 427
Children
genetically selected high iron maize in improving iron status of in Ghana (abstract), 333
Helicobacter pylori infection incidence and obesity in, 541
inflammatory polyp-fold complex in, 229
recurrent abdominal pain in with superior mesenteric artery thrombosis, 554
Chitons, ferrireductase in aged hemolymph of (abstract), 369
Chloroquine, as prophylactic treatment to minimize iron loading (abstract), 312
CHO cells, trafficking and localization of HFE in (abstract), 371
Cholangiographic pictures, in hepatic clonorchiasis, 183

Cholangiography, magnetic resonance, versus ultrasound for gallbladder evaluation, 233
Cholangiopancreatography, endoscopic retrograde, in acute and chronic pancreatitis, 560
Cholecystectomy, conventional versus laparoscopic, 129
Cholecystitis, in hemobilia and jaundice (letter), 191
Cholecystocutaneous fistula, presenting with cellulitis and portal vein thrombosis (letter), 99
Cholestasis, acute myeloid leukemia and, 485
Cholestatic hepatitis, *Teucrium polium* with transient antimitochondrial antibody in (letter), 100
Chronic iron loading, genomic analysis of rat hepatocytes under (abstract), 351
Circulation, free iron ion release in erythrocytes during aging process in (abstract), 352
Cirrhosis
  acute tension hydrothorax with (letter), 588
  adenomatous hyperplasia in, 272
  in end-stage liver disease, 89
  esophageal varices with, 81
  excess alcohol in prevalence of in hereditary hemochromatosis (abstract), 302
  Helicobacter pylori, arterial ammonia levels, and gastric juice in, 578
  hepatitis B virus-related, survival and prognostic indicators for after onset of hepatic decompensation, 569
  iron overload with, pathophysiology of (abstract), 318
  prediction of varices in (editorial), 4
  reversibility of after iron clearance and improved chronic hepatitis in thalassemic patients (abstract), 332
Cis-regulatory elements, identification of in HCH-ferritin gene in yellow fever mosquito (abstract), 366
Cobalamin, in selective regulation of H-ferritin subunits (abstract), 307
Cobalt, effect of on mRNA for transferrin receptors (abstract), 367
Coffee consumption, in failure of quadruple therapy for *Helicobacter pylori* infection, 547
Colitis
  Campylobacter jejuni, recurrent Henoch-Schönlein purpura with (letter), 492
  lansoprazole-associated, 164
  rofecoxib in, 451
Collagenous colitis, lansoprazole-associated, 164
Colon
  cancer of, treatment for, 15
  function of in short bowel syndrome, 207
  increased intraepithelial lymphocytes in with Hashimoto's thyroiditis, 237
  iron transport gene expression in (abstract), 363
  motility of, 225
  neoplasms of in elderly patients, 449
  phlebitis in wall and mesentery of, 252
Colonic J pouch, in colorectal cancer, 15
Colorectal adenoma, eicosanoids, cyclooxygenases and nonsteroidal anti-inflammatory drugs in, 117
Colorectal cancer
  decreased production of interleukin-12 and Type 2 immune responses in cachectic patients with, 416
  eicosanoids, cyclooxygenases and nonsteroidal anti-inflammatory drugs in, 117
  treatment of, 15
Common bile duct, absence of in chronic portal vein thrombosis, 280
Comparative modeling, of human hephaestin (abstract), 358
Computed tomography
  in clinical diagnosis of primary epiploic appendagitis, 435
  for hepatic neoplasms, 463
Constipation
  botulinum toxin in, 126
  tegaserod and, 27
Constrictive pericarditis, in chronic ulcerative colitis, 247
Copper
  deficiency of, iron absorption and (abstract), 376
  in iron transport by CaCO2 cells (abstract), 377
Coronary heart disease
  biochemical and genetic markers of iron status and risk of (abstract), 346
  HFE gene mutations and iron parameters in women with (abstract), 313
  iron concentration and (abstract), 346
Corticosteroids, for ulcerative colitis, 397
Cost-effectiveness analysis, for hemochromatosis population screening in Spain (abstract), 353

mRNA of, extending human and mouse (abstract), 329
transferrin saturation and unsaturated iron binding capacity in predicting (abstract), 335
IREG1 protein expression in (abstract), 328
juvenile and neonatal, ZIRTL sequence in (abstract), 329
liver iron concentration and proton transverse relaxation rates in (abstract), 325
non-HFE (abstract), 294
in Australian center (abstract), 330
phenotype of, β2-microglobulin genetic polymorphisms and mutations effect on (abstract), 338
population screening for (abstract), 322
reduced transcription from mutant allele in (abstract), 337
reverse cascade screening for (abstract), 319
as risk factor for Alzheimer's disease (abstract), 307
screening for
in arthritis population (abstract), 355
study design for (abstract), 353
two-step saturation transferrin (abstract), 320
survey of physician knowledge about (abstract), 356
TFR2 gene mutations in (abstract), 329
TNF α polymorphisms in arthropathy of (abstract), 336
type 3
private TFR2 mutations in (abstract), 330
transferrin receptor 2 gene mutation in (abstract), 315
X-ray microprobe synchrotron analysis of at advanced photon source (abstract), 358
Hemochromatosis mutations
analysis of, clinical correlation in elderly and (abstract), 338
dietary effects on ferritin levels with (abstract), 338
DNA screening for (abstract), 346
Hemochromatosis protein, partnership of with transferrin receptor (abstract), 314
Hemochromatosis stripassay, for molecular analysis of HFE and TFR2 gene mutations (abstract), 355
Hemodialysis, transfusion-transmitted virus with, 86
Hemoglobin
inhibited synthesis of during hyperoxic saturation diving and after hyperbaric oxygen treatment (abstract), 359
oxygen unloading from, 301
Hemoglobin E, proton transverse relaxation rates and heterogeneity of liver iron concentration in (abstract), 325
Hemoglobinization, molecules involved in compared to frataxin expression (abstract), 321
Hemolymph, aged, ferriruductase in (abstract), 369
Hemopexin heme transport system, in heme oxygenase-1 regulation (abstract), 371
Hemopoiesis, HFE expression and (abstract), 328
Hemosiderosis, pretransplant, liver allograft iron accumulation with (abstract), 331
Henoch-Schönlein purpura, recurrent with *Campylobacter jejuni* colitis (letter), 492
Heparin, for ulcerative colitis, 397
Hepatic artery, duplex Doppler ultrasonography of in alcoholic hepatitis, 573
Hepatic cells, receptor-dependent and -independent iron uptake from transferrin in (abstract), 377
Hepatic clonorchiasis, clinical and cholangiographic pictures of, 183
Hepatic cysts, computed tomographic and magnetic resonance imaging of, 463
Hepatic decompensation, survival and prognostic indicators for hepatitis B virus-related cirrhosis after onset of, 569
Hepatic Fas protein, expression of in hepatocellular carcinoma, 263
Hepatic fibrosis
interferon therapy and, 263
in iron overload (abstract), 308
Hepatic gene expression, of iron transporters in hemochromatosis or hepatitis C virus infection (abstract), 362
Hepatic hemosiderin, in iron overload patients (abstract), 332
Hepatic hydrothorax, with vitamin A toxicity, 275
Hepatic injury, losartan-induced, 585
Hepatic lipid peroxidation, improved after iron reduction therapy for chronic hepatitis C (abstract), 331
Hepatic neoplasms, VEGF expression in (abstract), 347
Hepatic sinusoidal endothelial cells, ultrastructural changes of in response to iron loading (abstract), 348
Hepatic stellate cells, NFκB-dependent transcriptional activity in (abstract), 308
Hepatitis B virus
in homeless population, 476
lamivudine for (letter), 190
Hepatitis B virus-related cirrhosis, survival and prognostic indicators for after onset of hepatic decompensation, 569
Hepatitis C virus
age-related penetrance of C282Y heterozygosity in (abstract), 303
evaluating eligibility for therapy among veterans with, 268
Fas protein expression in, 263
hepatic gene expression of iron transporters in (abstract), 362
high-dose interferon α-2b and ribavirin for, 177
in homeless population, 476
improved hepatic lipid peroxidation after iron reduction therapy for (abstract), 331
increased ferritin serum levels predicting poor response to interferon and ribavirin therapy for (abstract), 302
iron status and disease severity in (abstract), 338
iron storage and restoration rate estimation in (abstract), 350
mRNA translation, iron-dependent regulation of by EIF3 (abstract), 302
tissue 8-OHdG depletion in liver DNA with (abstract), 309
transfusion-transmitted, 86
Hepatitis virus
alcoholic, duplex Doppler ultrasonography of hepatic artery in, 573
associated with cetirizine intake (letter), 493
chronic
hepatic iron distribution in (abstract), 349
upregulation of transferrin receptors on hepatocytes and excess iron accumulation in (abstract), 377
cirrhosis reversibility after improvement in (abstract), 332
granulomatous, rosiglitazone-induced, 582
quantifying liver iron concentration in (abstract), 325
Teucrium polium with transient antimitochondrial antibody in (letter), 100
Hepatocellular adenoma, computed tomographic and magnetic resonance imaging of, 463
Hepatocellular carcinoma
computed tomographic and magnetic resonance imaging of, 463
Fas protein expression in, 263
pegylated liposomal doxorubicin with hyperthermia for, 96
Hepatocytes
ferritin and DMT1 in (abstract), 373
upregulation of transferrin receptors on and excess iron accumulation (abstract), 377
Hepatoma cells
cell proliferation effects on uptake of transferrin bound iron by (abstract), 377
iron inhibiting ferritin turnover in (abstract), 324
Hepatotoxicity
iron-induced, mechanisms of (abstract), 303
of losartan, 585
of rosiglitazone, 582
Hepcidin gene expression, lack of in upstream stimulation factor 2 knockout mice (abstract), 318
HEPG2 cells, insulin regulation of ceruloplasmin transcription in (abstract), 323
Hephaestin protein
ferroxidase activity for (abstract), 370
human, gene structure and comparative modeling of (abstract), 358
regulated by iron status (abstract), 363
Hereditary hemochromatosis gene product, DMT1 inhibition by (abstract), 323
Hereditary hemochromatosis HFE mRNA, extending human and mouse (abstract), 329
Hereditary hemochromatosis protein, DMT1 iron transporter upregulation with overexpression of (abstract), 327
Hereditary hyperferritinemia-cataract syndrome, clinical, biochemical, and molecular findings in families with (abstract), 318
Heteroduplex analysis on WAVE system, in detecting C282Y mutations (abstract), 355
Hexadentate 3-hydroxypyridin-4-one ligands, design and characterization of (abstract), 343
HFE compound heterozygotes, iron overload in (abstract), 340
HFE gene
biochemical expression of H63D mutation in (abstract), 299
C282Y+/+, decreased serum ceruloplasmin and ferroxidase activity in (abstract), 299
C282Y mutations
versus HFE wildtype proteins in cellular iron homeostasis (abstract), 329
prevalence of in elderly female population (abstract), 353
frequency of C282Y and H63D mutation of in Ukraine (abstract), 352

function and pathobiology of (abstract), 314
H63D mutation, in beta-thalassemia carriers (abstract), 326
hemopoiesis and expression of (abstract), 328
high frequency of H63D mutation in with malignant gliomas (abstract), 332
human, mRNA analysis of (abstract), 329
identification of endogenous RNA transcribed from antisense strand of (abstract), 366
identifying promoter elements and regulatory proteins of (abstract), 316
mRNA, extending human and mouse (abstract), 329
mutations of
allele frequency of in southern France (abstract), 352
in blood donors (abstract), 320
DMT-1 expression and (abstract), 362
grading and staging of (abstract), 349
hemochromatosis stripassay for molecular analysis of (abstract), 355
prevalence and penetrance of (abstract), 300
prevalence of in African Americans versus Caucasian Americans (abstract), 354
prevalence of in coronary heart disease (abstract), 313
probability of in relatives of C282Y and H63D heterozygotes (abstract), 356
relationship of ischemic heart disease to (abstract), 313
relationships with iron status and disease severity (abstract), 338
polymorphisms of, protecting against iron deficiency associated with blood donation (abstract), 335
promoter sequencing of, with hemochromatosis and atypical HFE genotypes (abstract), 336
targeted disruption of, differences in iron accumulation severity with (abstract), 336
targeted expression of in mouse intestine (abstract), 328
trafficking and localization of in CHO cells (abstract), 371
transferrin receptor 2 interaction with (abstract), 297
two functions of (abstract), 315
wildtype expression of reducing iron uptake at physiological transferrin concentrations (abstract), 327
HFE3 gene, juvenile hemochromatosis and (abstract), 305
HFE genotypes
atypical, HFE gene promoter sequencing with (abstract), 336
penetrance of (abstract), 339
HFE-knockout mice, DMT1 mediating enhanced intestinal iron absorpion in (abstract), 327
HFE protein
sharing binding site with transferrin (abstract), 327
wildtype versus HFE C282Y mutant proteins in cellular iron homeostasis (abstract), 329
HFE-related hemochromatosis, duodenal iron transporter gene expression in (abstract), 376
HFE-transferrin receptor interaction, structural biologic insights into (abstract), 294
hHFE expression, viral proteins interfering with (abstract), 305
High-affinity binding proteins, in iron homeostasis (abstract), 301
Hippocampal neurons, iron homeostasis and oxidative damage in (abstract), 352
HLA-A3 phenotype, frequencies of in Baltic region, 353
Homeless population, viral hepatitis and infectious diseases in, 476
Hospital-based screening, for C282Y hereditary hemochromatosis (abstract), 320
5-HT4 agonists, for irritable bowel syndrome, 27
Human immunodeficiency virus (HIV)
cytomegalovirus enterocolitis and, 243
in homeless population, 476
Human mitochondrial ferritin, structural and functional properties of (abstract), 296
Human NifS, in cellular iron-sulfur cluster biosynthesis (abstract), 368
Human serum, ferritin characteristics in (abstract), 369
Human transferrin C-lobe, preparation of in wild-type configuration (abstract), 300
Humanized anti-interleukin-2 monoclonal antibody, for ulcerative colitis, 397
Hybrid iron chelators, high anti-tumor activity of (abstract), 342
Hydrogen peroxide
in cellular iron metabolism modulation (abstract), 360
in modulation of intracellular labile iron pool in Jurkat T cell lines (abstract), 308
Hydrophilic chelators, iron mobilization, cytoprotective, and antiproliferative effects of (abstract), 342
Hydrothorax
acute tension, with cirrhosis (letter), 588
hepatic, with vitamin A toxicity, 275
Hydroxymethylbilane synthase gene mutations, in Italian patients with acute intermittent porphyria (abstract), 324
Hydroxypyridinone CP411, iron mobilization, cytoprotective, and antiproliferative effects of (abstract), 342
Hyperbaric oxygen treatment, inhibited synthesis of hemoglobin and increased serum ferritin after (abstract), 359
Hypercholesterolemia, familial, DNA screening for common hemochromatosis mutation in (abstract), 346
Hyperferremia
alpha-lipoic acid removing iron excess in (abstract), 344
in glial brain tumors (abstract), 349
Hyperferritinemia cataract syndrome, ferritin crystal cataracts and extraocular ferritin deposits in (abstract), 350
Hyperlipidemia, in nonalcoholic fatty liver disease, 255
Hyperoxic saturation diving, inhibited synthesis of hemoglobin and increased serum ferritin during (abstract), 359
Hyperphosphatemia, fatal, from phosphosoda bowel preparation, 457
Hyperthermia, with pegylated liposomal doxorubicin, 96
Hypertriglyceridemia-induced pancreatitis, long-term follow-up of, 472
Hypoalbuminemia, in gastric antral vascular ectasia (letter), 283
Hypotransferrinemic mice, iron oxide deposits in (abstract), 340

ICL670A, potent iron chelation properties of (abstract), 312
Ileal-anal pouch procedure, for ulcerative colitis, 397
Ileitis, pyloric metaplasia detection in biopsy diagnosis of, 141
Immune-mediated liver disease, RCAS1 expression in (letter), 286
Immune response
in Crohn's disease, 40
Type 2, in cachectic patients with colorectal and gastric cancer, 416
Immunity, laparoscopic surgery and (editorial), 109
Immunocompetent patient, cytomegalovirus enterocolitis in, 243
Immunoglobulin A (IgA), in celiac disease, 430
Immunomodulators, for ulcerative colitis, 397
Immunotherapy, for colorectal cancer, 15
Inbred mouse strains, genetic screen for quantitative trait loci conferring iron storage differences in (abstract), 315
Infectious diseases, in homeless population, 476
Inflammation mediated iron accumulation, sustained non-toxic oxidative stress and (abstract), 308
Inflammatory bowel disease, medical therapy of, 397
Inflammatory cytokines, in intracellular and secreted ferritin synthesis regulation (abstract), 367
Inflammatory polyp-fold complex, in children, 229
Inflammatory response, intestinal permeability and, 385
Infliximab, for esophagobronchial fistula with extensive Crohn's disease of esophagus (letter), 488
Insulin, in ceruloplasmin transcription regulation (abstract), 323
Interferon
Fas protein expression and, 263
increased ferritin serum levels predicting poor response to (abstract), 302
leptin response to (letter), 287
Interferon-α evaluating eligibility for among veterans with chronic hepatitis C virus, 268
Interferon α-2b, high-dose in patients previously treated with interferon, 177
Interferon β-1a, for ulcerative colitis, 397
Interferon-γ activated monocytic cells, translational silencing of ceruloplasmin in (abstract), 365
Interleukin-12, decreased production of in cachectic patients with colorectal and gastric cancer, 416
Intermittent porphyria, hydroxymethylbilane synthase gene mutations in Italian patients with (abstract), 324
Intestinal cells
IREG1 and DCYTB in iron trafficking in (abstract), 295
iron absorpion by (abstract), 375
transcytosis in iron transport in (abstract), 298
Intestinal dysplasia, diagnosis of, 111
Intestinal iron transporters, altered expression of in chronic liver disease (abstract), 318
Intestinal obstruction, after radical gynecologic surgery (letter), 105
Intestine
IREG1 protein expression for in hemochromatosis (abstract), 328
iron absorption by, functional approaches to (abstract), 295
permeability of and gastrointestinal disease, 385
polyps of in elderly patients, 449
protein loss of in acute, persistent diarrhea of early childhood, 427
targeted HFE expression in (abstract), 328
Intracellular labile iron pools
iron-specific fluorescent probes in monitoring (abstract), 317
modulation of in Jurkat T cell lines (abstract), 308
Intraepithelial lymphocytes, increased with Hashimoto's thyroiditis, 237
Intrahepatic cholangiocarcinoma, computed tomographic and magnetic resonance imaging of, 463
Intronless gene, encoding human mitochondrial ferritin (abstract), 296
IRE sequence mutation, scanning techniques for (abstract), 365
IREG1 protein
in hemochromatosis liver and intestine (abstract), 328
in iron trafficking in mammalian intestine and other cells (abstract), 295

Iron
absorption of
copper deficiency and (abstract), 376
in proximal tubules (abstract), 297
accumulation of
detecting in blood donors with phenotypic testing (abstract), 336
differences in severity of between C57BL/6 and DBA/2 mice with targeted disruption of HFE gene (abstract), 336
with liver allograft in pretransplant hepatic hemosiderosis (abstract), 331
strain differences in susceptibility to (abstract), 315
upregulation of transferrin receptors on hepatocytes in (abstract), 377
acquisition of, ferric uptake regulator protein in (abstract), 306
alcohol and (abstract), 304
in cell cycle control (abstract), 351
cellular homeostasis of, heme-hemopexin in (abstract), 296
clearance of, cirrhosis reversibility after (abstract), 332
as cofactor in liver diseases (abstract), 304
concentrations of, heart disease and (abstract), 346
deloading of, iron oxide particle size distribution during (abstract), 340
delocalization of, in iron regulatory protein modulation (abstract), 300
depletion of
in Danish women aged 40–70 years (abstract), 334
protecting against ischemic heart disease (abstract), 312
deposition of, sequential assessment of in rats following long-term intraperitoneal iron dextran injections (abstract), 343
deprivation of
apoptosis induced by (abstract), 309
tumor cell sensitivity to apoptosis induction by (abstract), 350
in divalent metal transporter-1 and ferroportin-1 regulation (abstract), 297
in duodenal cytochrome B expression and function (abstract), 373
in dysmetabolic iron overload syndrome during and after phlebotomy therapy or restriction caloric intake (abstract), 331
excess of, alpha-lipoic acid removing (abstract), 344
expression of in duodenal biopsy in iron deficiency and iron overload (abstract), 317
ferritin as nutritional source of (abstract), 334
handling of by Belgrade rat (abstract), 361
in HCV mRNA translation regulation mediated by EIF3 (abstract), 302
hepatic distribution of in chronic viral hepatitis (abstract), 349
in human brain (abstract), 349
inflammation-mediated accumulation of (abstract), 308
inhibiting ferritin turnover in hepatoma cells (abstract), 324
interaction with novel aminopyridyl chelators (abstract), 310
intestinal absorption of
DMT1 mediating in HFE-knockout mice (abstract), 327
functional approaches to (abstract), 295
in rat intestinal cells (abstract), 375
in intracellular and secreted ferritin synthesis regulation (abstract), 367
liver concentrations of, magnetic resonance imaging of (abstract), 341
liver content of, uroporphyria caused by (abstract), 347
liver transport of (abstract), 295
measurements of by biosusceptometry and quantitative magnetic resonance imaging (abstract), 339
mitochondrial, lipophilic chelators in binding (abstract), 302
mobilization of in normal and transformed rat hepatocyte cultures by hydroxypyridinone CP411 versus CP20 (abstract), 342
multiple sites for in ferritin mineralization (abstract), 301
mutagenesis studies of cellular binding, release, and uptake of (abstract), 368
nitric oxide-mediated mobilization of from cells (abstract), 372
non-heme, DMT1 regulation by in human intestinal CaCO2 cells (abstract), 374
non-transferrin bound, antimycin A stimulation of uptake in HeLa cells (abstract), 372
non-transferrin-bound, vitamin C status and removal of in thalassemia major (abstract), 312
in overexpression of H- and L-ferritins in HeLa cells (abstract), 300
pumping (abstract), 314
receptor-mediated acquisition of from transferrin and lactoferrin in gram-negative bacteria (abstract), 306
release of
inhibited blockade of (abstract), 315
from N-lobe of human transferrin probed by mutagenesis and crystallography (abstract), 357
in response to UVA-induced oxidative stress (abstract), 347
storage and restoration rate of in chronic hepatitis C treated by phlebotomy (abstract), 350
structural principles of binding and release of (abstract), 301
trafficking of, IREG1 and DCYTB in (abstract), 295
uptake of
receptor-dependent and -independent (abstract), 377
transferrin receptor-mediated, during post-ischemic rat liver reperfusion (abstract), 304
wildtype HFE gene expression in reduction of (abstract), 327
usage of, yeast frataxin stimulating (abstract), 321
in UVA-mediated gene expression (abstract), 309
UVA-mediated release of in UVA-induced necrotic cell death (abstract), 309
in zucchini under saline stress (abstract), 370
Iron binding
capacity of in predicting HFE-related hemochromatosis (abstract), 335
tumor cell cytotoxicity and (abstract), 310
Iron binding compounds, in human brain (abstract), 349
Iron blood parameters, with targeted HFE expression in mouse intestine (abstract), 328
Iron chelation
aroylhydrazones in (abstract), 344
ferritin pore and (abstract), 366
in thalassemia major (abstract), 343
Iron chelators
as anti-tumor agents (abstract), 311
in cell cycle progression (abstract), 351
cytotoxicity of, molecular mechanisms of (abstract), 311
desferrithicin class, as antineoplastic agents (abstract), 350
high anti-tumor activity of (abstract), 342
in vitro and in vivo properties of (abstract), 312
iron mobilization, cytoprotective, and antiproliferative effects of (abstract), 342
leukemic cell growth inhibition as target for ribonucleotide reductase by (abstract), 342
in manganese-induced toxicity of rat pheochromocytoma cells (abstract), 348
orally active (abstract), 344
preventing iron-mediated free radical generation (abstract), 343
tachypyridine as in p53-independent apoptosis (abstract), 305
triapine as (abstract), 344
Iron chips, human and murine (abstract), 296
Iron complex efflux rate, in efficiency of pyridoxal isonicotinoyl hydrazone analogs at mobilizing cellular iron (abstract), 310
Iron complexes, pyridoxal isonicotinoyl hydrazone analog toxicity and (abstract), 341
Iron deficiency
associated with blood donation, HFE gene polymorphisms protecting against (abstract), 335
in blood donors (abstract), 320
DMT1 iron transporter upregulation with (abstract), 327
duodenal iron transporter gene expression in (abstract), 376
iron molecule expression in duodenal biopsy in (abstract), 317
population-based five year follow-up study of (abstract), 335
in regional transferrin, transferrin receptor proteins, and mRNA levels in rat brain (abstract), 378
Iron deficiency anemia, endoscopy outcomes in after Billroth II partial gastrectomy, 421
Iron deficiency-induced proteins, in halotolerant alga dunaliella (abstract), 316
Iron dextran, intraperitoneal injections of, sequential assessment of iron deposition following (abstract), 343
Iron dyshomeostasis, in frataxin expression in Friedreich's ataxia cells (abstract), 307
Iron exchange indices, nonheme, determined in whole blood (abstract), 333
Iron homeostasis
in blood donors (abstract), 362
cellular, nitric oxide-mediated IRP2 modulation in (abstract), 359
ceruloplasmin homologue implicated in (abstract), 358
HFE wildtype versus HFE C282Y mutant proteins in (abstract), 329
in hippocampal neurons and neuroblastoma cells (abstract), 352
iron binding and release principles in (abstract), 301
nonclassical Class 1 MHC molecule regulating (abstract), 305
using animal models (abstract), 294
Iron indices, hemochromatosis genotype and life-style factors effects on (abstract), 340
Iron-induced hepatotoxicity, mechanisms of (abstract), 303
Iron-loaded gerbil model, deferoxamine and deferiprone treatment in (abstract), 351
Iron loading
chronic
genomic analysis of rat hepatocytes under (abstract), 351
rat hepatocyte gene expression changes under (abstract), 367
impairing in vivo macrophage function (abstract), 351
iron oxide particle size distribution during (abstract), 340
prophylactic chloroquine to minimize (abstract), 312
proton transverse relaxation rates in (abstract), 325
ultrastructural change in hepatic sinusoidal endothelial cells with (abstract), 348
VEGF expression in chemically induced hepatic neoplasm with (abstract), 347
Iron-mediated cardiotoxicity, of anti-tumor therapy (abstract), 314
Iron metabolism
abnormal, modulating serum transferrin receptor levels in mice with (abstract), 363

abstracts from BIOIRON 2001 World Congress on, 292
cellular, hydrogen peroxide modulation of (abstract), 360
changes of in HeLa cells transfected with cDNA for human mitochondrial ferritin precursor (abstract), 378
disruption of in Alzheimer's and Parkinson's disease (abstract), 304
genome-wide analysis of (abstract), 314
glial brain tumors and (abstract), 349
of macrophages, consequences of (abstract), 323
molecules involved in compared to frataxin expression (abstract), 321
nitric oxide and NRAMP1 in regulation of (abstract), 317

Iron-restricted diet, in tissue 8-OHdG depletion in liver DNA (abstract), 309
Iron shuttle hypothesis, in chelation therapy (abstract), 311
Iron-specific fluorescent probes, design and application of for intracellular labile iron pool monitoring (abstract), 317
Iron status
biochemical and genetic markers of (abstract), 346
cadmium exposure during pregnancy and lactation and (abstract), 334
in Danes (abstract), 334
effect of on DMT1 expression in duodenal enterocytes in hereditary hemochromatosis (abstract), 375
of elderly men from Netherlands and Greece (abstract), 313
genetically selected high iron maize in improving for children in Ghana (abstract), 333
hepatitis C virus severity and (abstract), 338
in human astrocytoma cells and mouse brain macrophages (abstract), 322
regulating hephaestin protein level (abstract), 363
Iron storage
in African-American and U.S. Caucasian populations (abstract), 299
differential expression of iron transport genes with changes in (abstract), 378
DMT-1 expression and (abstract), 362
duodenal expression of divalent metal transporter 1 and transferrin receptor and (abstract), 319
genetic screen for quantitative trait loci conferring (abstract), 315
Iron-sulfur cluster assembly complexes, in cytosol, nucleus, and mitochondria of mammalian cells (abstract), 363
Iron-sulfur cluster biosynthesis, human NifS and (abstract), 368
Iron-transferrin homeostasis, in epithelial cells (abstract), 306
Iron transport
copper and ceruloplasmin effect on in CaCO2 cells (abstract), 377
and divalent metal transporter 1 expression in brain of Belgrade rat (abstract), 321
identifying genes involved in pituitary gland (abstract), 378
luminal pH and overnight fasting effects on (abstract), 376
by macrophages in hereditary hemochromatosis (abstract), 297
NRAMP1 gene in with multiple sclerosis (abstract), 348
transcytosis in (abstract), 298
Iron transport genes
high expression of in distal small intestine and colon (abstract), 363
polymorphisms of in iron homeostasis (abstract), 362
Iron transporters
activity of inhibited by hereditary hemochromatosis gene product (abstract), 323
altered expression of in chronic liver disease (abstract), 318
gene expression of in activated rat hepatic stellate cells (abstract), 347
hepatic gene expression of in hemochromatosis or hepatic C virus infection (abstract), 362
isoforms of, tissue-specific and iron-dependent expression of (abstract), 364
regulation of in CaCO2 cells (abstract), 360
Iron(III), biologically active aroylhydrazone chelator oxidation of catalyzed by (abstract), 342
Irritable bowel syndrome
prevalence of in gastroesophageal reflux, 221
T-cell immune parameters and depression with, 40
tegaserod for, 27
Ischemic heart disease
HFE gene mutations relationship to (abstract), 313
iron depletion as protection against (abstract), 312
Ischemic rat liver reperfusion, transferrin receptor-mediated iron uptake after (abstract), 304
Italian population
ferrochelatase gene mutations with erythropoietic protoporphyria in (abstract), 324
hydroxymethylbilane synthase gene mutations with acute intermittent porphyria in (abstract), 324
molecular characterization of aceruloplasminemia in (abstract), 330
uroporphyrinogen decarboxylase (UROD) gene in with familial porphyria cutanea tarda (abstract), 330
Italy
E168X and W169X HFE mutations prevalence in health blood donors in (abstract), 356
prevalence of C282Y and H63D mutations among iron overloaded subjects in (abstract), 354

Japanese population, iron storage and restoration rate estimation in chronic hepatitis C patients among (abstract), 350
Jaundice
acalculous cholecystitis in (letter), 191
obstructive, acute myeloid leukemia presenting as, 485
Jejunocolic fistula, with AIDS-associated lymphoma (letter), 194
Jurkate T cells, modulation of intracellular labile iron pool in (abstract), 308

Juvenile hemochromatosis
clinical expression of (abstract), 305
ZIRTL sequence in (abstract), 329

K562 cells
erythroleukemia, lipophilicity of pyridoxal isonicotinoyl hydrazone analogs determining toxicity toward (abstract), 341
extracellular calcium and potassium stimulatory effect on uptake of non-transferrin ferric iron by (abstract), 374
Ketorolac tromethamine, acute pancreatitis caused by (letter), 283
Kidney proximal tubules, DMT1 expression in (abstract), 364
Kidneys, DMT-1 expression in (abstract), 323
Knockout mouse model, iron status effect on DMT1 expression in duodenal enterocytes in (abstract), 375

L-ferritins
overexpression of in HeLa cells (abstract), 300
scanning techniques for IRE sequence mutations of (abstract), 365
Labile intracellular iron, in non-transferrin bound iron uptake by HeLa cells (abstract), 372
Labile iron pools
in formation of oxidative DNA damage in mammalian cells (abstract), 360
intracellular, iron-specific fluorescent probes in monitoring (abstract), 317
RNA-binding activity of IRP1 and (abstract), 359
Laboratory diagnostic tests, in acute pancreatitis, 459
Lactation, cadmium exposure and iron status during (abstract), 334
Lactoferrin
in iron binding and release (abstract), 301
receptor-mediated iron acquisition from in gram-negative bacteria (abstract), 306
Lactoferrin binding protein A, bacterial, recognizing lactoferrin C-lobe domains (abstract), 372

RCAS1 expression, in immune-mediated liver diseases (letter), 286
Reactive nitrogen species, in iron regulatory protein modulation (abstract), 300
Reactive oxygen species, in doxorubicin-inactivated cardiac IRP-1 and IRP-2 (abstract), 314
REAL classification, of low-grade follicular lymphoma of small intestine, 155
Recombinant non-glycosylated human serum transferrin, containing N- or C-terminal hexa-histidine TAG (abstract), 370
Rectal bleeding, with Takayasu's arteritis and Crohn's disease, 454
Rectal cancer, treatment of, 15
Red blood cells
free iron ion release in during aging process (abstract), 352
indices of, hemochromatosis genotype and life-style factors effects on (abstract), 340
Redox-active iron complex, triapine forming (abstract), 344
Reflux esophagitis, inflammatory polyp-fold complex with, 229
Regulatory proteins, identification of (abstract), 316
Reinfection, after peptic ulcer eradication, 129
Renal failure, giant nonpancreatic pseudocyst and, 160
Resistive index, in alcoholic hepatitis, 573
Respiratory burst oxidase, as iron reductase (abstract), 374
Restless legs syndrome, iron metabolism disorder in (abstract), 321
Retroperitoneal surgery, portal decompression before for severe portal hypertension (letter), 489
Reverse cascade screening, for hemochromatosis (abstract), 319
Reverse-hybridization assay
in hereditary hemochromatosis diagnosis (abstract), 326
for molecular analysis of HFE and TFR2 gene mutations (abstract), 355
Rheumatoid arthritis, eosinophilic enterocolitis in (letter), 487
Ribavirin
increased ferritin serum levels predicting poor response to (abstract), 302
in patients previously treated with interferon, 177
Ribonucleotide reductase, as target for leukemic cell growth inhibition (abstract), 342
RNA, endogenous, identification of from antisense strand of HFE gene (abstract), 366
RNA-binding activity, anti-tumor agents modifying in iron regulatory proteins (abstract), 308
Rofecoxib, in acute colitis, 451
Rome I criteria, for irritable bowel syndrome, 221
Rosiglitazone, in granulomatous hepatitis, 582

(S)-4,5-dihydro-2-(2-hydroxyphenyl)-4-thiazolecarboxylic acids, hydroxylation of (abstract), 311
S-nitrosylation, of IRP2, leading to proteasomal degradation (abstract), 323
Saccharomyces cerevisiae, cell biology of siderophore uptake in (abstract), 306
Salvage therapy
after quadruple therapy failure for *Helicobacter pylori* infection, 547
for colorectal cancer, 15
SAPK/JNK pathway, heme-hemopexin activating (abstract), 296
Sarcoidosis, esophageal, 54
Satiety, in end-stage liver disease, 89
S65C mutations, prevalence of among Norwegians (abstract), 354
Scintigraphy, gastric emptying, 34
Sclerosis, limited cutaneous systemic, gastric antral vascular ectasia as presenting feature of (letter), 490
Scotland, prevalence of hemochromatosis in and HFE gene mutations relationship to ischemic heart disease (abstract), 313
Screening
for hemochromatosis and iron overload (abstract), 353
for hemochromatosis in arthritis population (abstract), 355
for HFE mutations in relatives of C282Y and H63D heterozygotes (abstract), 356
strategies for in C282Y-linked hemochromatosis (abstract), 299
Sengstaken-Balkemore tube, rapid placement of with guidewire (letter), 282
Sentinel lymph node mapping, for colorectal cancer, 15
Serotonin, in gastrointestinal tract function, 27
Severity, of acute pancreatitis, 167
Short bowel syndrome
intravenous proton pump inhibitor for, 62
nutritional management of, 207
Short-chain fatty acids, for ulcerative colitis, 397
Sialyl Lewis^a, in prognosis of gastric cancer patients, 408
Sialyl Lewis^x, in prognosis of gastric cancer patients, 408
Sickle cell disease, ferritin and (abstract), 303
Siderophore-dependent iron metabolism, in mucorales (abstract), 345
Siderophore mimetics, structural design of (abstract), 345
Siderophores
of fluorescent pseudomonads (abstract), 345
uptake of, cell biology of in saccharomyces cerevisiae (abstract), 306
Single nucleotide polymorphisms, in genes involved in iron metabolism (abstract), 328
Site-directed *Haemophilus influenzae* ferric-binding protein mutants, in vivo and in vitro analysis of (abstract), 358
Small angle neutron scattering, in measuring iron oxide particle size distribution during iron loading and deloading (abstract), 340
Small bowel obstruction
after radical gynecologic surgery (letter), 105
in squamous cell carcinoma of penis (letter), 289
Small-intestinal brush border membrane, divalent iron and other transitional metal ion transport across (abstract), 375
Small intestine
iron transport gene expression in (abstract), 363
leiomyosarcoma of (letter), 104
low-grade follicular lymphoma of, 155
phlebitis in wall and mesentery of, 252
Snare related protein, interaction with DMT1 IRE isoform C-terminus (abstract), 295
Sociodemographics, in uninvestigated dyspepsia, 516
South Africa
hereditary hemochromatosis diagnosis in (abstract), 326
NRAMP1 gene in iron transport in multiple sclerosis patients in (abstract), 348
Spain, cost-effectiveness analysis of population screening for hemochromatosis in (abstract), 353
Sphincter of Oddi dysfunction, botulinum toxin in, 126
Sphincter preservation, in colorectal cancer, 15
Splenomegaly, esophageal varices and, 81
Squamous cell carcinoma, of penis, small bowel obstruction with (letter), 289
SQUID-biosusceptometry, in liver iron quantification (abstract), 341

Starvation-induced DNA-binding protein, of *Euryarchaeon halobacterium* (abstract), 370
Steatohepatitis, nonalcoholic, 255
Steatosis, hepatic, 255
Stellate cells, activated rate hepatic, gene expression of iron transporters in (abstract), 347
Stents, plastic tube, 77
Steroid-refractory ulcerative colitis, cyclosporine in (letter), 101
Structural biology, in HFE-transferrin receptor interaction (abstract), 294
Substance-related disorders, eligibility for therapy for among veterans, 268
Sulfasalazine, in constrictive pericarditis, 247
Sulfate-reducing bacterium, bacterioferritin from (abstract), 371
Superior mesenteric artery thrombosis, isolated, 554
Supplementation, dietary, for short bowel syndrome, 207
Surgery
  for colorectal cancer, 15
  laparoscopy-assisted, 144
  systemic immunity and (editorial), 109
  for ulcerative colitis, 397
Surgical techniques, for colorectal cancer, 15
Survival, in hepatitis B virus-related cirrhosis after onset of hepatic decompensation, 569
Sweden, mild phenotypic expression of hereditary hemochromatosis in (abstract), 337
Synchronous tumors, with gastric cancer, 533
Systematic gene sequencing, versus bioinformatic extraction in identifying single nucleotide polymorphisms (abstract), 328
Systemic immunity, laparoscopic surgery and (editorial), 109

T-cell immune parameters, in Crohn's disease, 40
T-cell-mediated antibacterial activity, after conventional versus laparoscopic cholecystectomy, 129
T cell receptor, aberrant expression of in Crohn's disease, 64
Tachpyridine, as iron chelator and potential anti-cancer agent (abstract), 305
Takayasu's arteritis, Crohn's disease and, 454
Tegaserod, effectiveness of, 27
Tension hydrothorax, with cirrhosis (letter), 588
Teransferrin receptors, hemochromatosis protein partnership with (abstract), 314
Tetracycline-inducible IRP1-C437S expression, cellular responses to (abstract), 317
Teucrium polium, in cholestatic hepatitis (letter), 100
TFR2 gene mutations
  in hemochromatosis and iron overload syndromes not linked to HFE (abstract), 329
  hemochromatosis stripassay for molecular analysis of (abstract), 355
  in hemochromatosis type 3 (abstract), 330
Th1/Th2 balance, in colorectal and gastric cancer, 416
Thalassemia
  cirrhosis reversibility after iron clearance and improvement in chronic hepatitis in (abstract), 332
  ferritin and (abstract), 303
  HFE gene H63D mutation in (abstract), 326
Thalassemia major
  iron chelation in (abstract), 343
  non-transferrin-bound iron removal by desferrioxamine in (abstract), 312
Therapeutic venesection, ARCBS policy on (abstract), 356
Thiopurine methyltransferase enzyme, for ulcerative colitis, 397
Three-dimensional reconstruction, of complex of transferrin receptor and diferric transferrin based on (abstract), 358
Thrombocytopenia, esophageal varices and, 81
Thrombosis, superior mesenteric artery, in recurrent abdominal pain in children, 554
Thymidylate synthase, for colorectal cancer, 15
Ticlopidine, endoscopic evidence of mucosal injury with, 529
Tissue 8-OHdG depletion, in liver DNA with chronic hepatitis C (abstract), 309
Tissue iron overload, in upstream stimulation factor 2 knockout mice (abstract), 318
Total parenteral nutrition, for short bowel syndrome, 207
Toupet fundoplication
  for gastroesophageal reflux disease (editorial), 499
  long-term outcomes after, 509
Trace metals, essential, duodenal brush border transport of versus B-class soft metals (abstract), 376
Training, of gastroenterologists as physician-nutrition specialists, 505
Transcript circularization, in translational silencing of ceruloplasmin in interferon-γ activated monocytic cells (abstract), 365
Transcytosis, in intestinal iron transport (abstract), 298
Transferrin
  anion-binding sites of (abstract), 368
  in iron binding and release (abstract), 301
  iron deficiency effect on in rat brain (abstract), 378
  N-lobe of probed by mutagenesis and crystallography (abstract), 357
  peptide-peptide interactions between bacterial transferrin binding protein B and (abstract), 361
  receptor-dependent and -independent iron uptake from (abstract), 377
  receptor-mediated iron acquisition from in gram-negative bacteria (abstract), 306
  recombinant non-glycosylated human serum, containing N- or C-terminal hexahistidine TAG (abstract), 370
  saturation levels of and H63D presence (abstract), 339
  saturation of
    in predicting HFE-related hemochromatosis (abstract), 335
    and serum ferritin concentration (abstract), 299
  sharing binding site with hemochromatosis protein (abstract), 327
  two-step saturation screening for genotypically defined hemochromatosis (abstract), 320
Transferrin-binding protein A, meningococcal, structural studies of (abstract), 357
Transferrin-bound iron
  cell proliferation effects on uptake of by hepatoma cells (abstract), 377
  inhibition of uptake of (abstract), 315
  uptake of, wildtype HFE gene expression in reduction of Vmax for (abstract), 327
Transferrin C-lobe, preparation of in wild-type configuration (abstract), 300
Transferrin-iron homeostasis, in epithelial cells (abstract), 306
Transferrin receptor 1, in normal lymphopoiesis (abstract), 319
Transferrin receptor 2
  gene mutation of in hemochromatosis type 3 (abstract), 315
  interacting with HFE (abstract), 297
  molecular characterization of (abstract), 372
Transferrin receptor-mediated iron uptake
  during post-ischemic rat liver reperfusion (abstract), 304
  sustained non-toxic oxidative stress increasing (abstract), 308
Transferrin receptors
  cobalt and mRNA for (abstract), 367
  duodenal expression of in celiac disease (abstract), 319
  electron microscopy imaging and three-dimensional reconstruction of (abstract), 358
  gene polymorphism of, in Australian Parkinson's disease patients (abstract), 331
  interaction with HFE (abstract), 294
  iron deficiency effect on in rat brain (abstract), 378
  IRP-dependent expression of during erythroid differentiation (abstract), 301
  modulating serum levels of in mice with abnormal iron metabolism (abstract), 363
  mRNA IREs of in IRP binding (abstract), 364
  soluble (abstract), 333
    antigenesity of (abstract), 333
  soluble and membrane bound in Friedreich ataxia (abstract), 374
  transferrin and hemochromatosis protein sharing binding site on (abstract), 327
  upregulation of on hepatocytes in excess iron accumulation in chronic hepatitis (abstract), 377
Transfusion-transmitted virus, in patients undergoing hemodialysis, 86
Transient abdominal pain, hereditary angioedoma in, 57
Transition metal ions
  reduction of, transplasma membrane electron transport in macrophages and (abstract), 346
Transitional metal ions
  transport of across small-intestinal brush border membrane (abstract), 375
Transjugular intrahepatic portosystemic shunt, for portal decompression before abdominal and retroperitoneal surgery (letter), 489
Translational silencing, of ceruloplasmin in interferon-γ activated monocytic cells (abstract), 365
Transplasma membrane electron transport, in transition metal ion reduction and cell-mediated low-density lipoprotein oxidation (abstract), 346
Transverse colon, motility of, 225
Treatment resistance, of gastrointestinal ulceration with aspirin abuse, 523
Triapine, in iron chelation and forming redox-active iron complex (abstract), 344
Triple therapy, quadruple therapy after failure of for *Helicobacter pylori* infection, 547
Trypsinogen-2, in acute pancreatitis diagnosis, 459
Tuberculosis, in homeless population, 476
Tumor cells
  cytotoxicity of, iron-binding structure-activity relationships with (abstract), 310
  differing sensitivity of to apoptosis induction by iron deprivation (abstract), 350
Tumor escape mechanism, in colorectal and gastric cancer, 416
Tumor immunology, in colorectal and gastric cancer, 416
Tumor necrosis factor α polymorphisms, in arthropathy of hemochromatosis (abstract), 336
Tumor necrosis factor α promoter polymorphisms, phenotypic expression of hereditary hemochromatosis influenced by (abstract), 337
Tumorigenesis, eicosanoids, cyclooxygenases and nonsteroidal anti-inflammatory drugs in, 117
Tumors
  associated with gastric cancer, 533
  downstaging of in colorectal cancer, 15
  with gastric cancer (editorial), 501
  multiple, with gastric cancer, 533
Turcot syndrome, in elderly adults, 449

Two-step saturation transferrin screening, for genotypically defined hemochromatosis (abstract), 320

Ukraine, frequency of C282Y and H63D mutation in HFE gene in (abstract), 352
Ulcerative colitis
constrictive pericarditis in, 247
dysplasia in, 111
medical therapy of, 397
steroid-refractory (letter), 101
Ulcers
multiple, with aspirin abuse, 523
recurrence of after peptic ulcer eradication, 129
relapse of with aspirin abuse, 523
Ultrasonography
in clinical diagnosis of primary epiploic appendagitis, 435
duplex Doppler, of hepatic artery in acute alcoholic hepatitis, 573
endoscopic, in multiple lymphomatous polyposis, 150
versus magnetic resonance cholangiography for gallbladder evaluation, 233
Universal screening, for hereditary hemochromatosis (abstract), 322
Upstream stimulation factor 2 knockout mice, lack of hepcidin gene expression and tissue iron overload in (abstract), 318
Ureteric band obstruction, after radical gynecologic surgery (letter), 105
Uroporphyria, with FE and ALA (abstract), 347
Uroporphyrinogen decarboxylase (UROD) gene, in Italian patients with familial porphyria cutanea tarda (abstract), 330
Urticaria, with transient abdominal pain, 57
UVA-induced oxidative stress, iron release in cells as response to (abstract), 347
UVA-mediated gene expression, iron in (abstract), 309
UVA-mediated iron release, in UVA-induced necrotic cell death (abstract), 309

Varices, prediction of in cirrhosis (editorial), 4
VEGF expression, in chemically-induced hepatic preneoplastic and neoplastic lesions in iron loaded mice (abstract), 347
Veterans
eligibility of for chronic hepatitis C therapy, 268
homeless, viral hepatitis and infectious diseases in, 476
Viral hepatitis, in homeless population, 476
Viral proteins, interfering with hHFE expression (abstract), 305
Vitamin A toxicity, hepatic hydrothorax with, 275
Vitamin B12, in selective regulation of H-ferritin subunits (abstract), 307
Vitamin C status, in removal of non-transferrin-bound iron by desferrioxamine in thalassemia major (abstract), 312
Vitamin supplementation, in short bowel syndrome, 207
Vmax, for transferrin iron uptake, wildtype HFE gene expression in reduction of (abstract), 327

Watermelon stomach, hypoalbuminemia and anemia with (letter), 283
WAVE system heteroduplex analysis, in detecting C282Y mutations (abstract), 355
Whole blood, nonheme iron exchange indices in (abstract), 333
Women
elderly, prevalence of HFE gene C282Y mutations in (abstract), 353
iron depletion and overload in among Danes (abstract), 334
in women, HFE gene mutations and iron parameters in (abstract), 313
W169X HFE mutations, prevalence of in healthy blood donors in northern Italy (abstract), 356

X-ray microprobe synchrotron analysis, of hemochromatosis liver at advanced photon source (abstract), 358

Yeast frataxin, stimulating iron usage and inhibiting fenton chemistry (abstract), 321
Yellow fever mosquito, identifying cis-regulatory elements of HCH-ferritin gene in (abstract), 366

Zelnorm, effectiveness of, 27
Zinc, interaction with novel aminopyridyl chelators (abstract), 310
ZIRTL sequence, in juvenile and neonatal hemochromatosis (abstract), 329
Zucchini, iron and phytochemicals in under saline stress (abstract), 370
